Subject: ICMR International Fellowship Programme for Biomedical Scientists from Developing Countries – Request for Dissemination
Attachments: Flyer- ICMR International Fellowship for Scientists from Developing Countries.pdf

Dear Mr. Ambassador,

Warm greetings from the Indian Council of Medical Research (ICMR).

ICMR is India's premier national agency for biomedical research, aligned with national health priorities and actively engaged in strengthening research capacity, innovation, and translation of scientific knowledge into public health practice. In view of the rapid advances in biomedical sciences and the shared health challenges faced by developing countries, ICMR places strong emphasis on international collaboration and capacity building.

To promote South-South cooperation, ICMR offers an International Fellowship Programme for biomedical scientists from developing countries, enabling short-term training (1-6 months) at leading Indian research institutes in areas such as diagnostics, epidemiology, surveillance, genomics, immunology, and other biomedical research areas. The fellowship covers return economy airfare and a sustenance allowance (for accommodation, food and local transport).

Eligible applicants should be citizens of developing countries according to the world bank criteria, employed in recognized academic or research institutions, preferably below 45 years of age, with qualifications such as Bachelor of Medicine and Bachelor of Surgery (MBBS) or Master of Science (Life Sciences). Applications may be submitted throughout the year and are selected by an Expert Committee constituted by the Director General, ICMR.

We kindly seek your support in disseminating this information so that suitable candidates from your country who are eligible for this fellowship may apply. Detailed guidelines and the application format are available on the ICMR website: <https://www.icmr.gov.in/icmr-international-fellowship-programme-for-biomedical-scientists-from-developing-countries> [icmr.gov.in]. A flyer is also attached herewith for easy dissemination.

Should there be any queries, we would be happy to clarify them. We look forward to your cooperation in disseminating this information.

Thank you.

Dr. Tanvir Kaur

INDIAN COUNCIL OF
MEDICAL RESEARCH

ICMR International Fellowship Programme For Scientists from Developing Countries

Enhancing research capacity and fostering
South-South collaboration by offering
hands-on biomedical research training in
premier Indian institutions

Program Focus Areas

- Epidemiology & Disease Surveillance
- Diagnostics & Molecular Medicine
- Immunology & Genomics
- Biomedical Research
- Public Health Research & Innovation

Fellowship Details

- Duration: 1–6 Months
- No. of Fellowships: 5 /Year
- Support Provided: Return economy airfare & Daily subsistence allowance

Who can apply

- Scientists from developing countries as per World Bank
- MBBS / M.Sc. (Life Sciences)
- Employed in recognized institutions
- Preferably below 45 years
- English proficiency required

Benefits of the Fellowship

- Exposure to global scientific networks
- Advanced research training in India's top biomedical labs
- Opportunities for future collaborative projects
- Enhanced skill-set in high-impact health research areas

Applications accepted throughout the year
